## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 20, 22-29 and 40-43 are allowed.

### ***Reasons for Allowance***

Claims 20, 22-29 and 40-43 are allowed since there is no prior art of record that teaches or suggests a liquid crystal display comprising a relationship of various elements as claimed with the specific allowable subject matter cited in the following claim:

#### **Claim 20:**

- a plurality of pixel units, each of the pixel units including an upper transparent electrode, a liquid crystal layer, a lower transparent electrode, and a color filter formed on the upper substrate
- wherein a surface of each color filter has a plurality of curved convex structures, and the upper transparent electrode directly contacts and covers the curved convex structures on the surface of each of the color filters

Claims 22-29 and 40-43 are allowed since they depend on the allowed claim 20.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nagata et al (US 6,118,505) discloses color filters formed on thin film transistor substrate, and that pixel electrode directly contacts the color filters. However, surface of each of the color filters are flat.

Takao et al (US 5,734,456) discloses surface of each of color filters has a plurality of curved convex structures. However, electrode does not form directly contacted the color filter since there is an overcoat layer to form on the color filters to flatten the surface of color filters.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
